

SERVICE 05

Concrete & structure

Rafts, walls, columns and slabs, placed, finished and cured by our own crews.

Villa contracting in Dubai

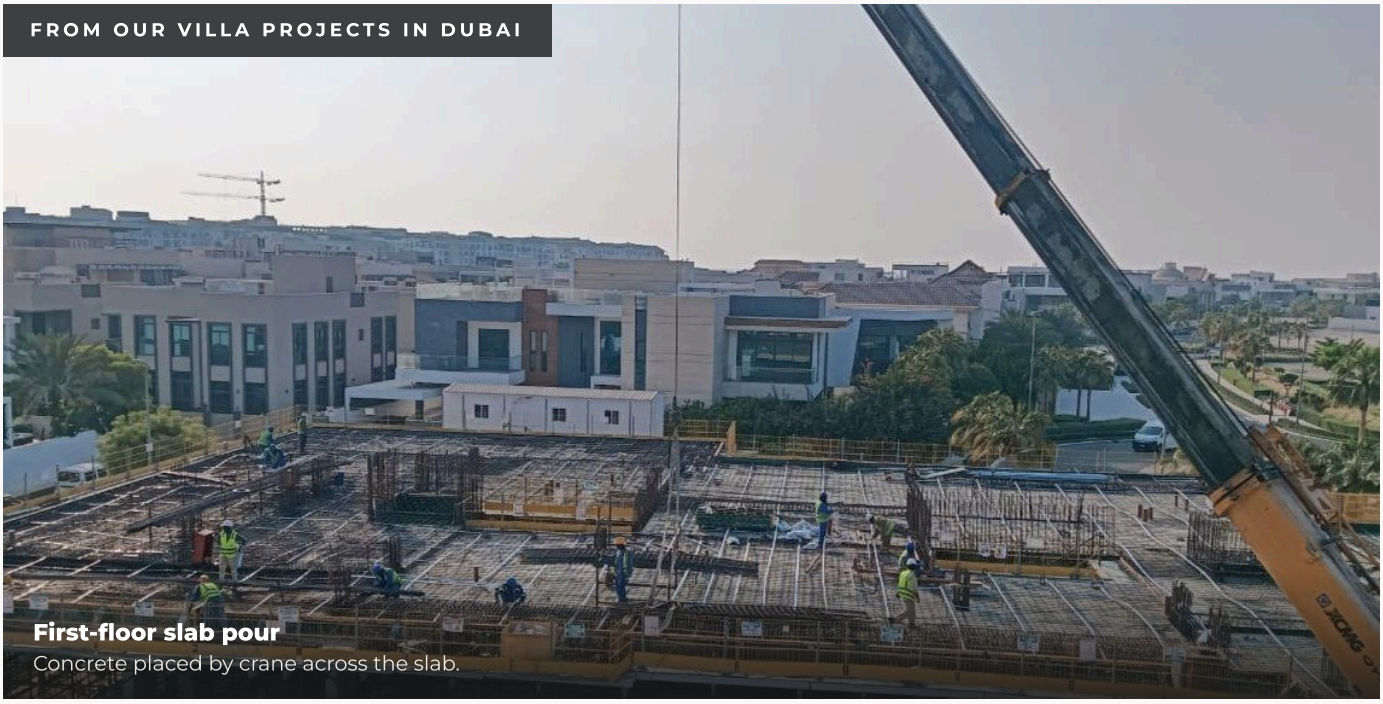

05

CONCRETE & STRUCTURE

Structures cast clean and true.

We place, compact and cure concrete for rafts, walls, columns, beams and slabs, by pump or crane. Every pour is planned with the supplier and the consultant, and our crews finish, cure and protect the concrete so it reaches its full strength.

FROM OUR VILLA PROJECTS IN DUBAI

First-floor slab pour
Concrete placed by crane across the slab.

WHAT WE COVER

- Raft foundations and footings
- Basement and retaining walls
- Columns, shear walls and cores
- Beams and suspended slabs
- Stairs, ramps and upstands
- Curing, de-shuttering and making good

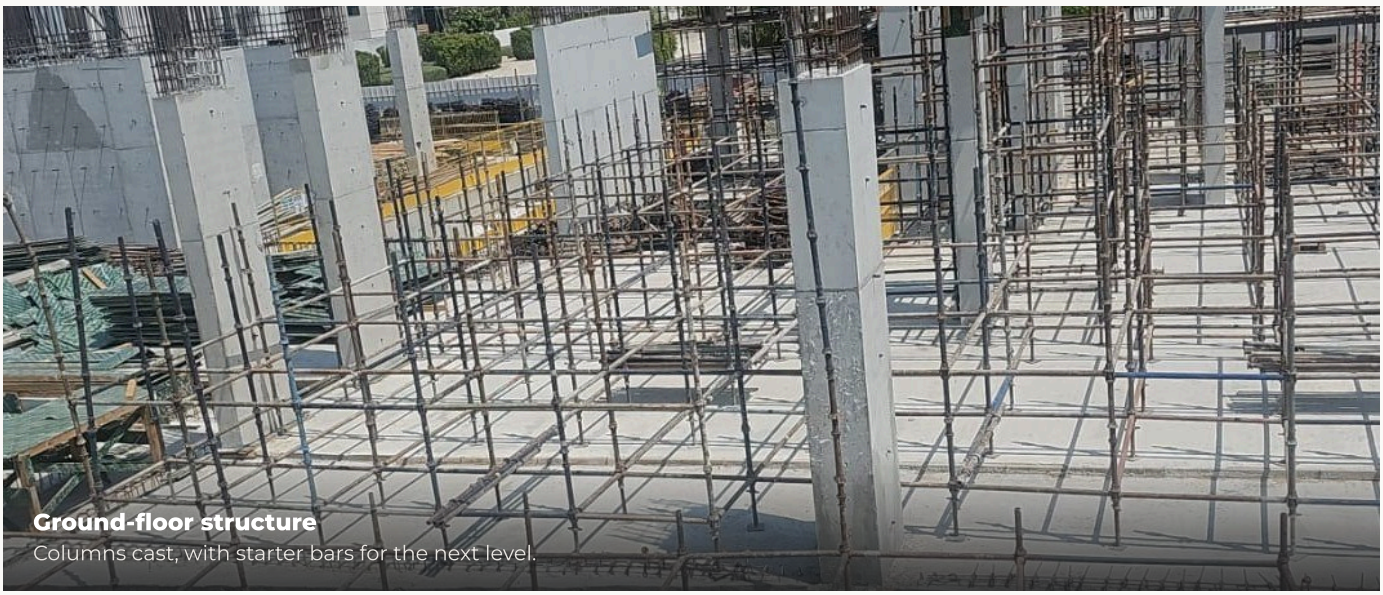

HOW WE WORK

01 Plan
Pour sequence, supply and inspections booked ahead.

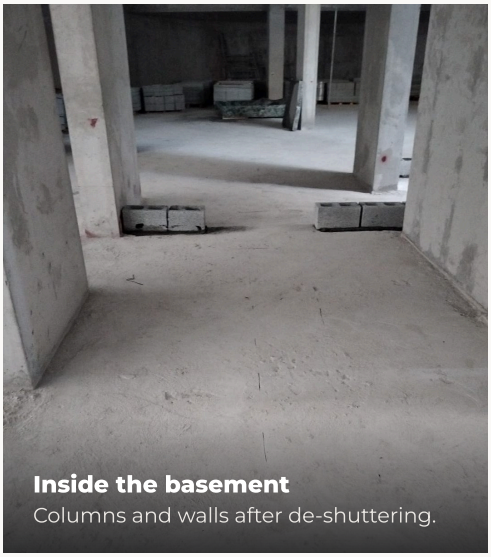

02 Pour
Placed by pump or crane, in planned layers.

03 Compact & finish
Vibrated, levelled and finished as specified.

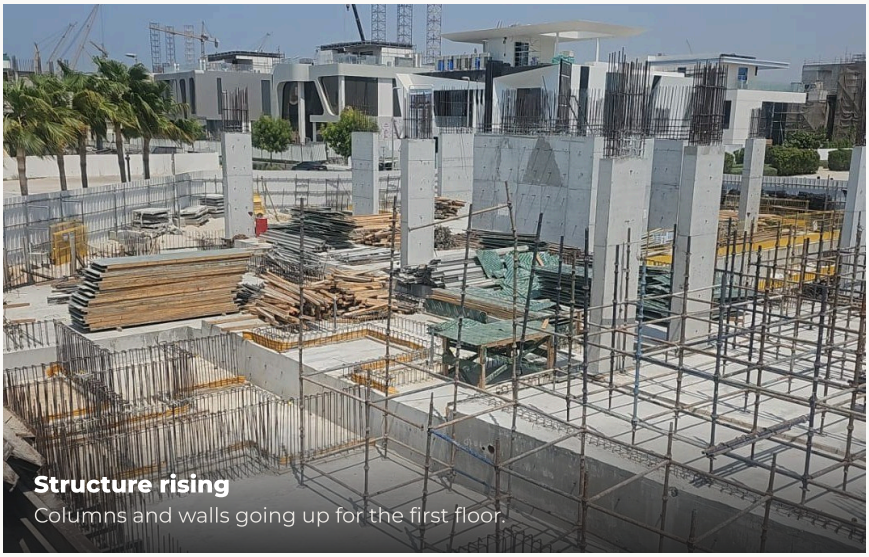

04 Cure
Kept wet and protected while it gains strength.

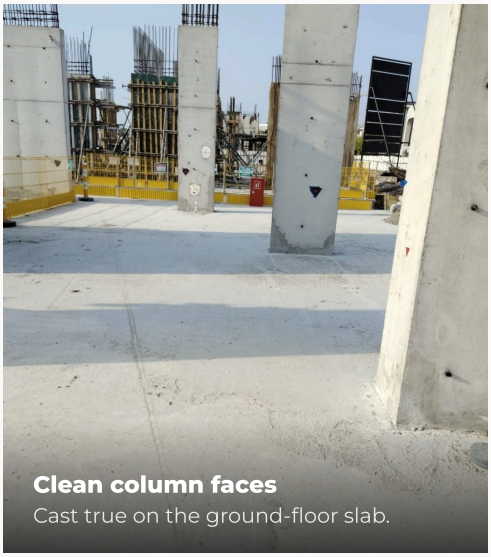

Ground-floor structure
Columns cast, with starter bars for the next level.

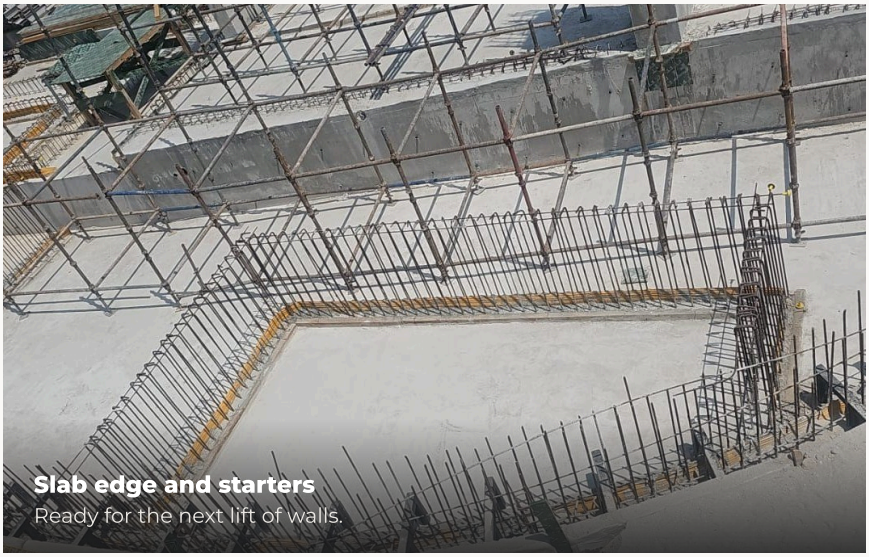

Inside the basement
Columns and walls after de-shuttering.

Structure rising
Columns and walls going up for the first floor.

Clean column faces
Cast true on the ground-floor slab.

Slab edge and starters
Ready for the next lift of walls.

CONCRETE & STRUCTURE

Clean faces, sharp edges.

Placed, compacted and cured for a finish you can build on.

Inside the structure
Columns and slab after de-shuttering.

Basement corridor
Clean walls and floor, ready for finishes.

Ground floor rising
Columns and walls going up.

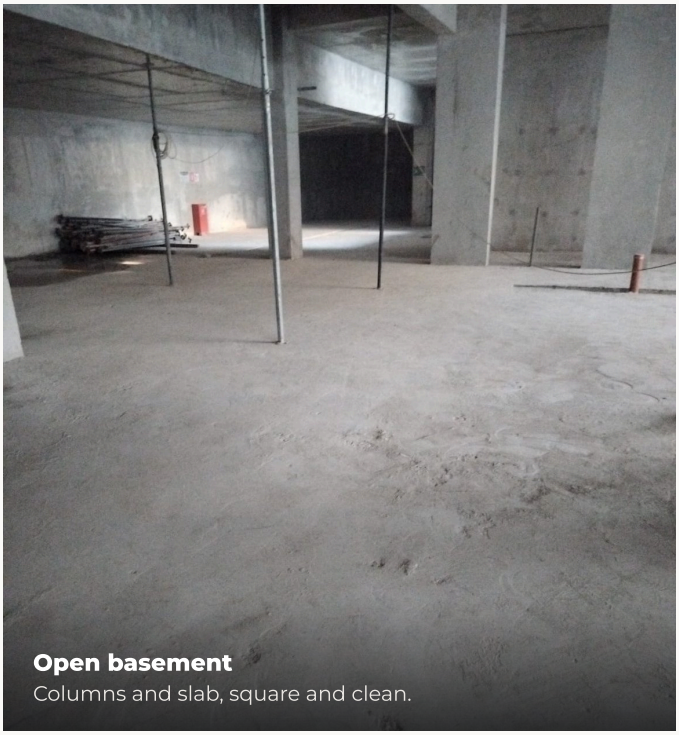

Basement floor
Slab cast level with sleeves in place.

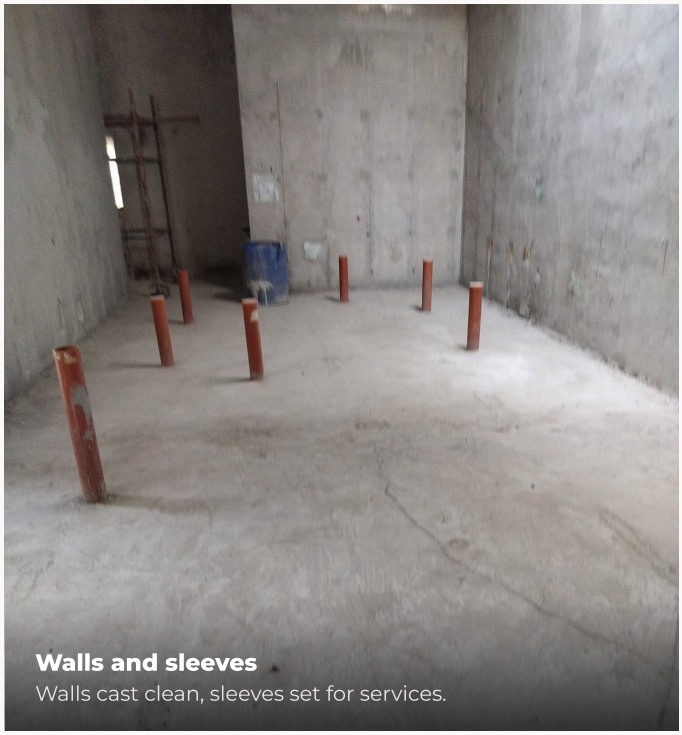

IN DETAIL

Strength proven, not assumed

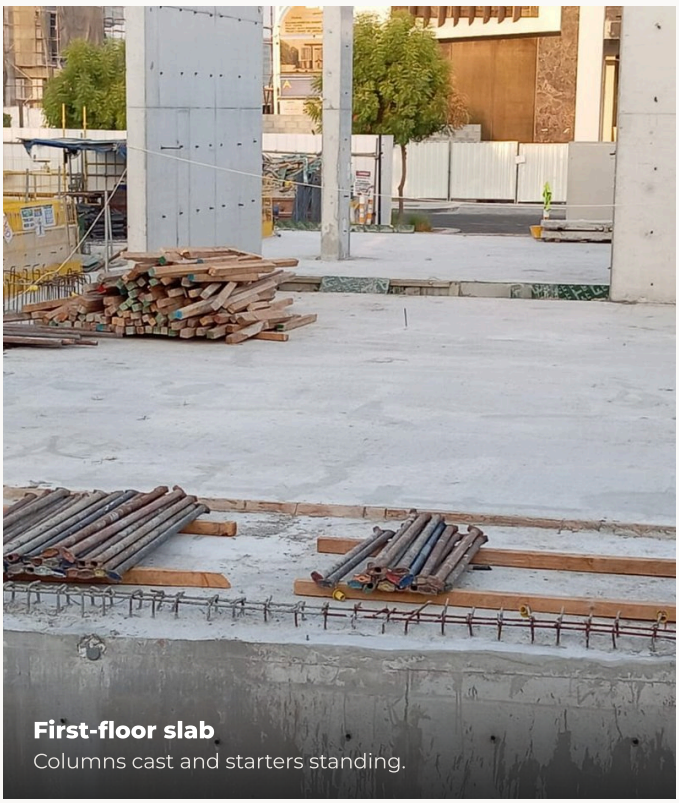

Every pour is sampled: slump checked and test cubes taken, so the strength is tested in the lab.

Open basement
Columns and slab, square and clean.

Walls and sleeves
Walls cast clean, sleeves set for services.

First-floor slab
Columns cast and starters standing.

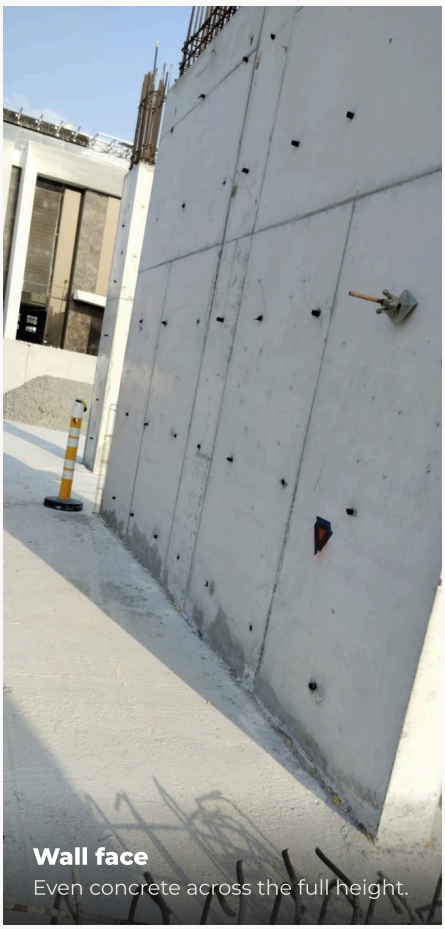

Structure rising
Columns going up for the next floor.

Openings
Sharp edges around a wall opening.

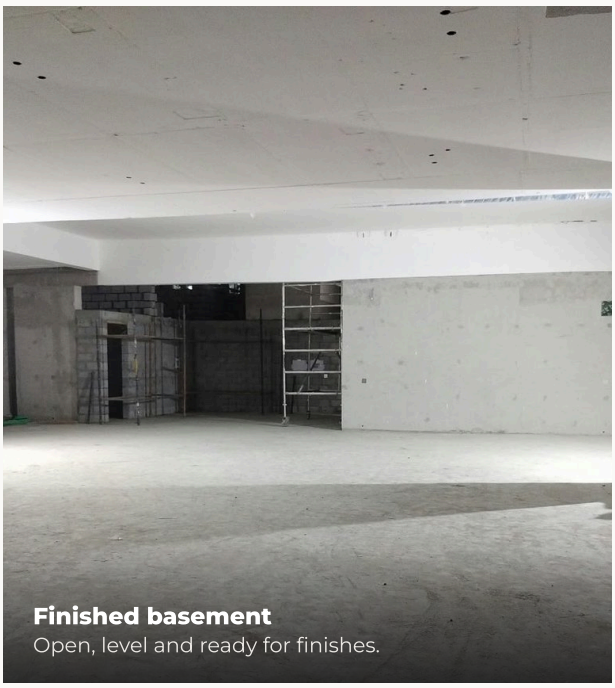

Fair-faced wall
Smooth faces straight from the forms.

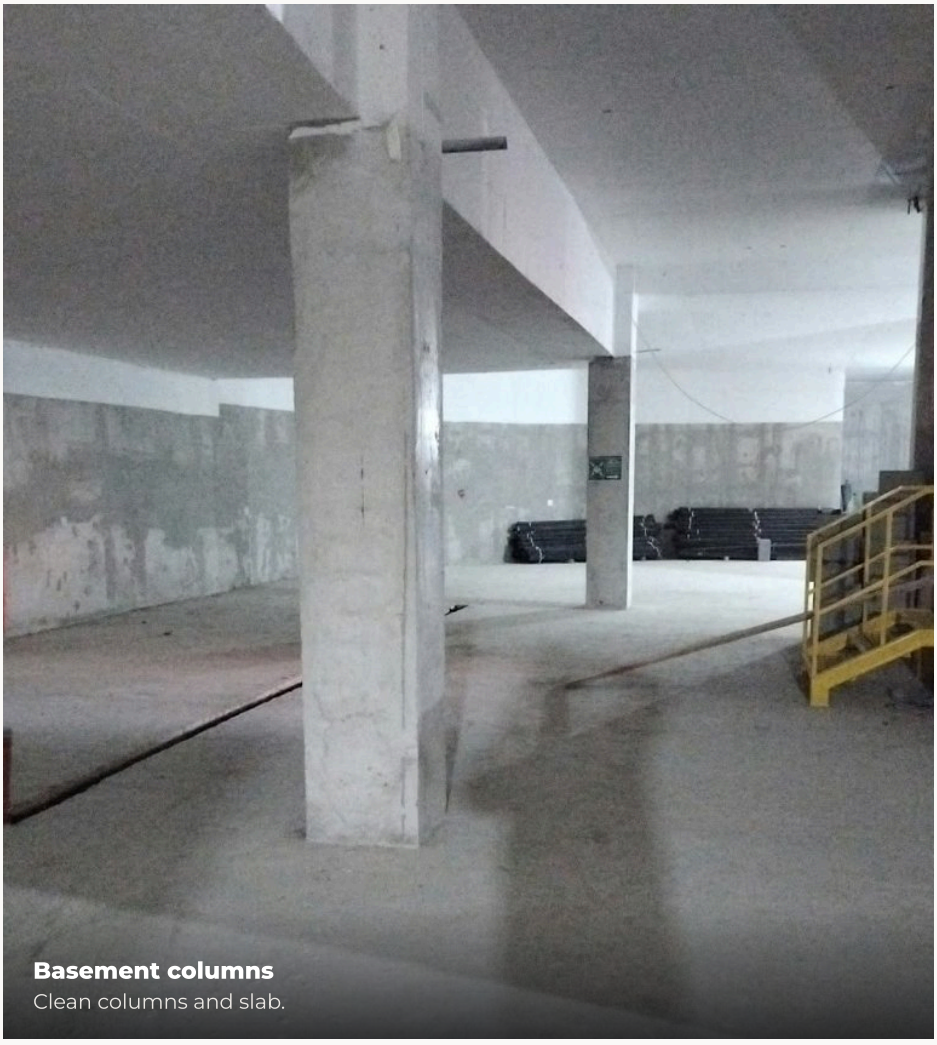

Wall face
Even concrete across the full height.

Columns and walls
Clean faces across the ground floor.

Finished basement
Open, level and ready for finishes.

Basement columns
Clean columns and slab.

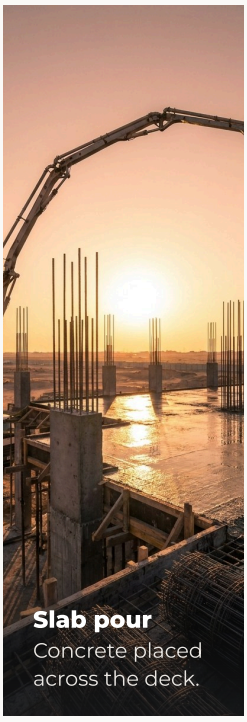

Pour at sunrise
Concrete placed by boom pump.

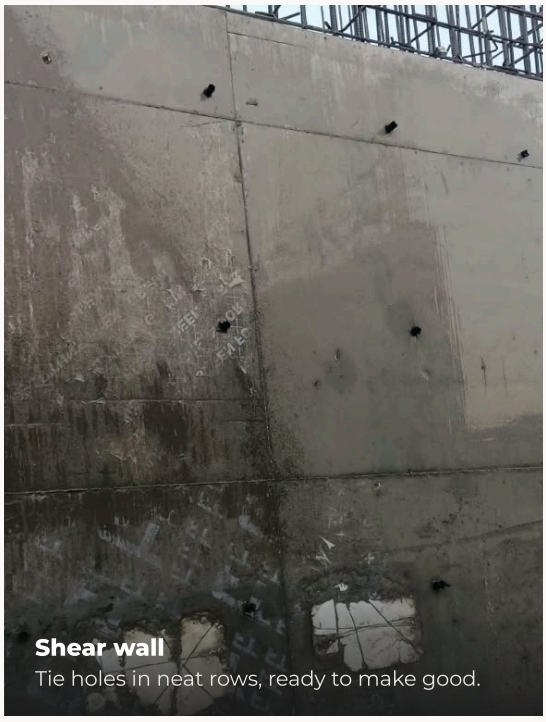

First-floor columns
Cast true and square.

Columns in line
Set out on every grid line.

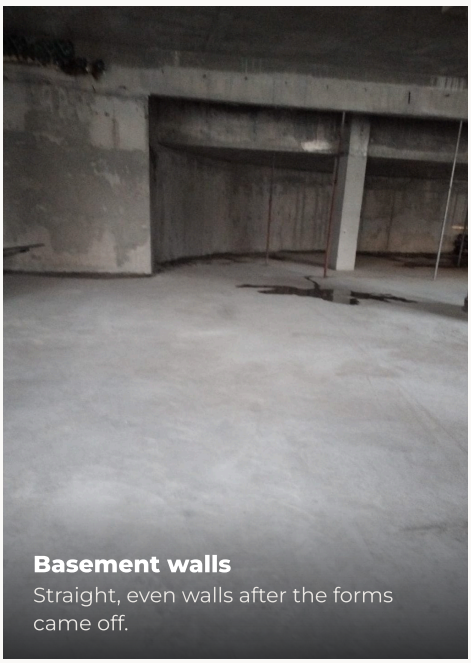

Slab pour
Concrete placed across the deck.

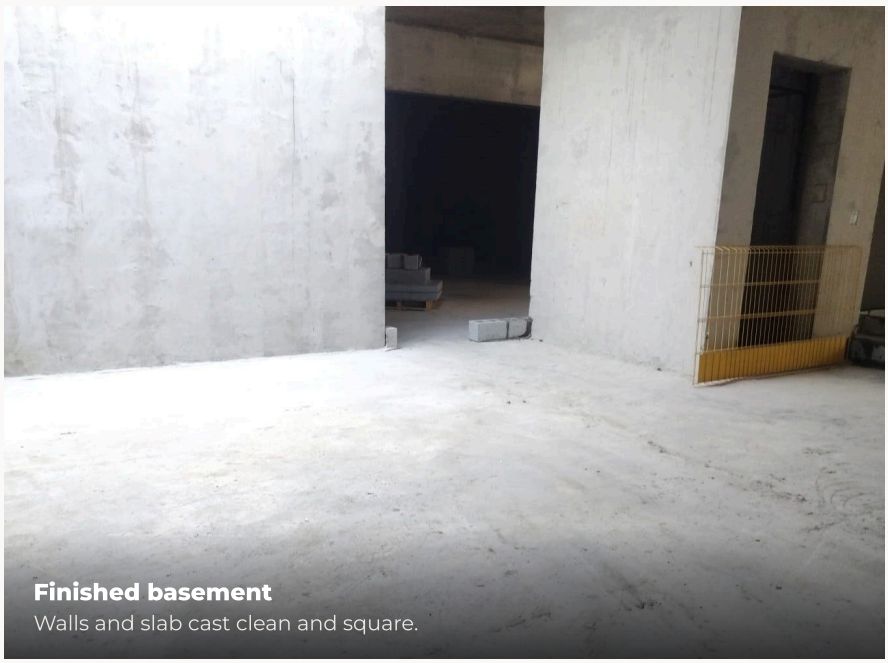

Shear wall
Tie holes in neat rows, ready to make good.

Ground beams
Beams cast and protected.

Basement walls
Straight, even walls after the forms came off.

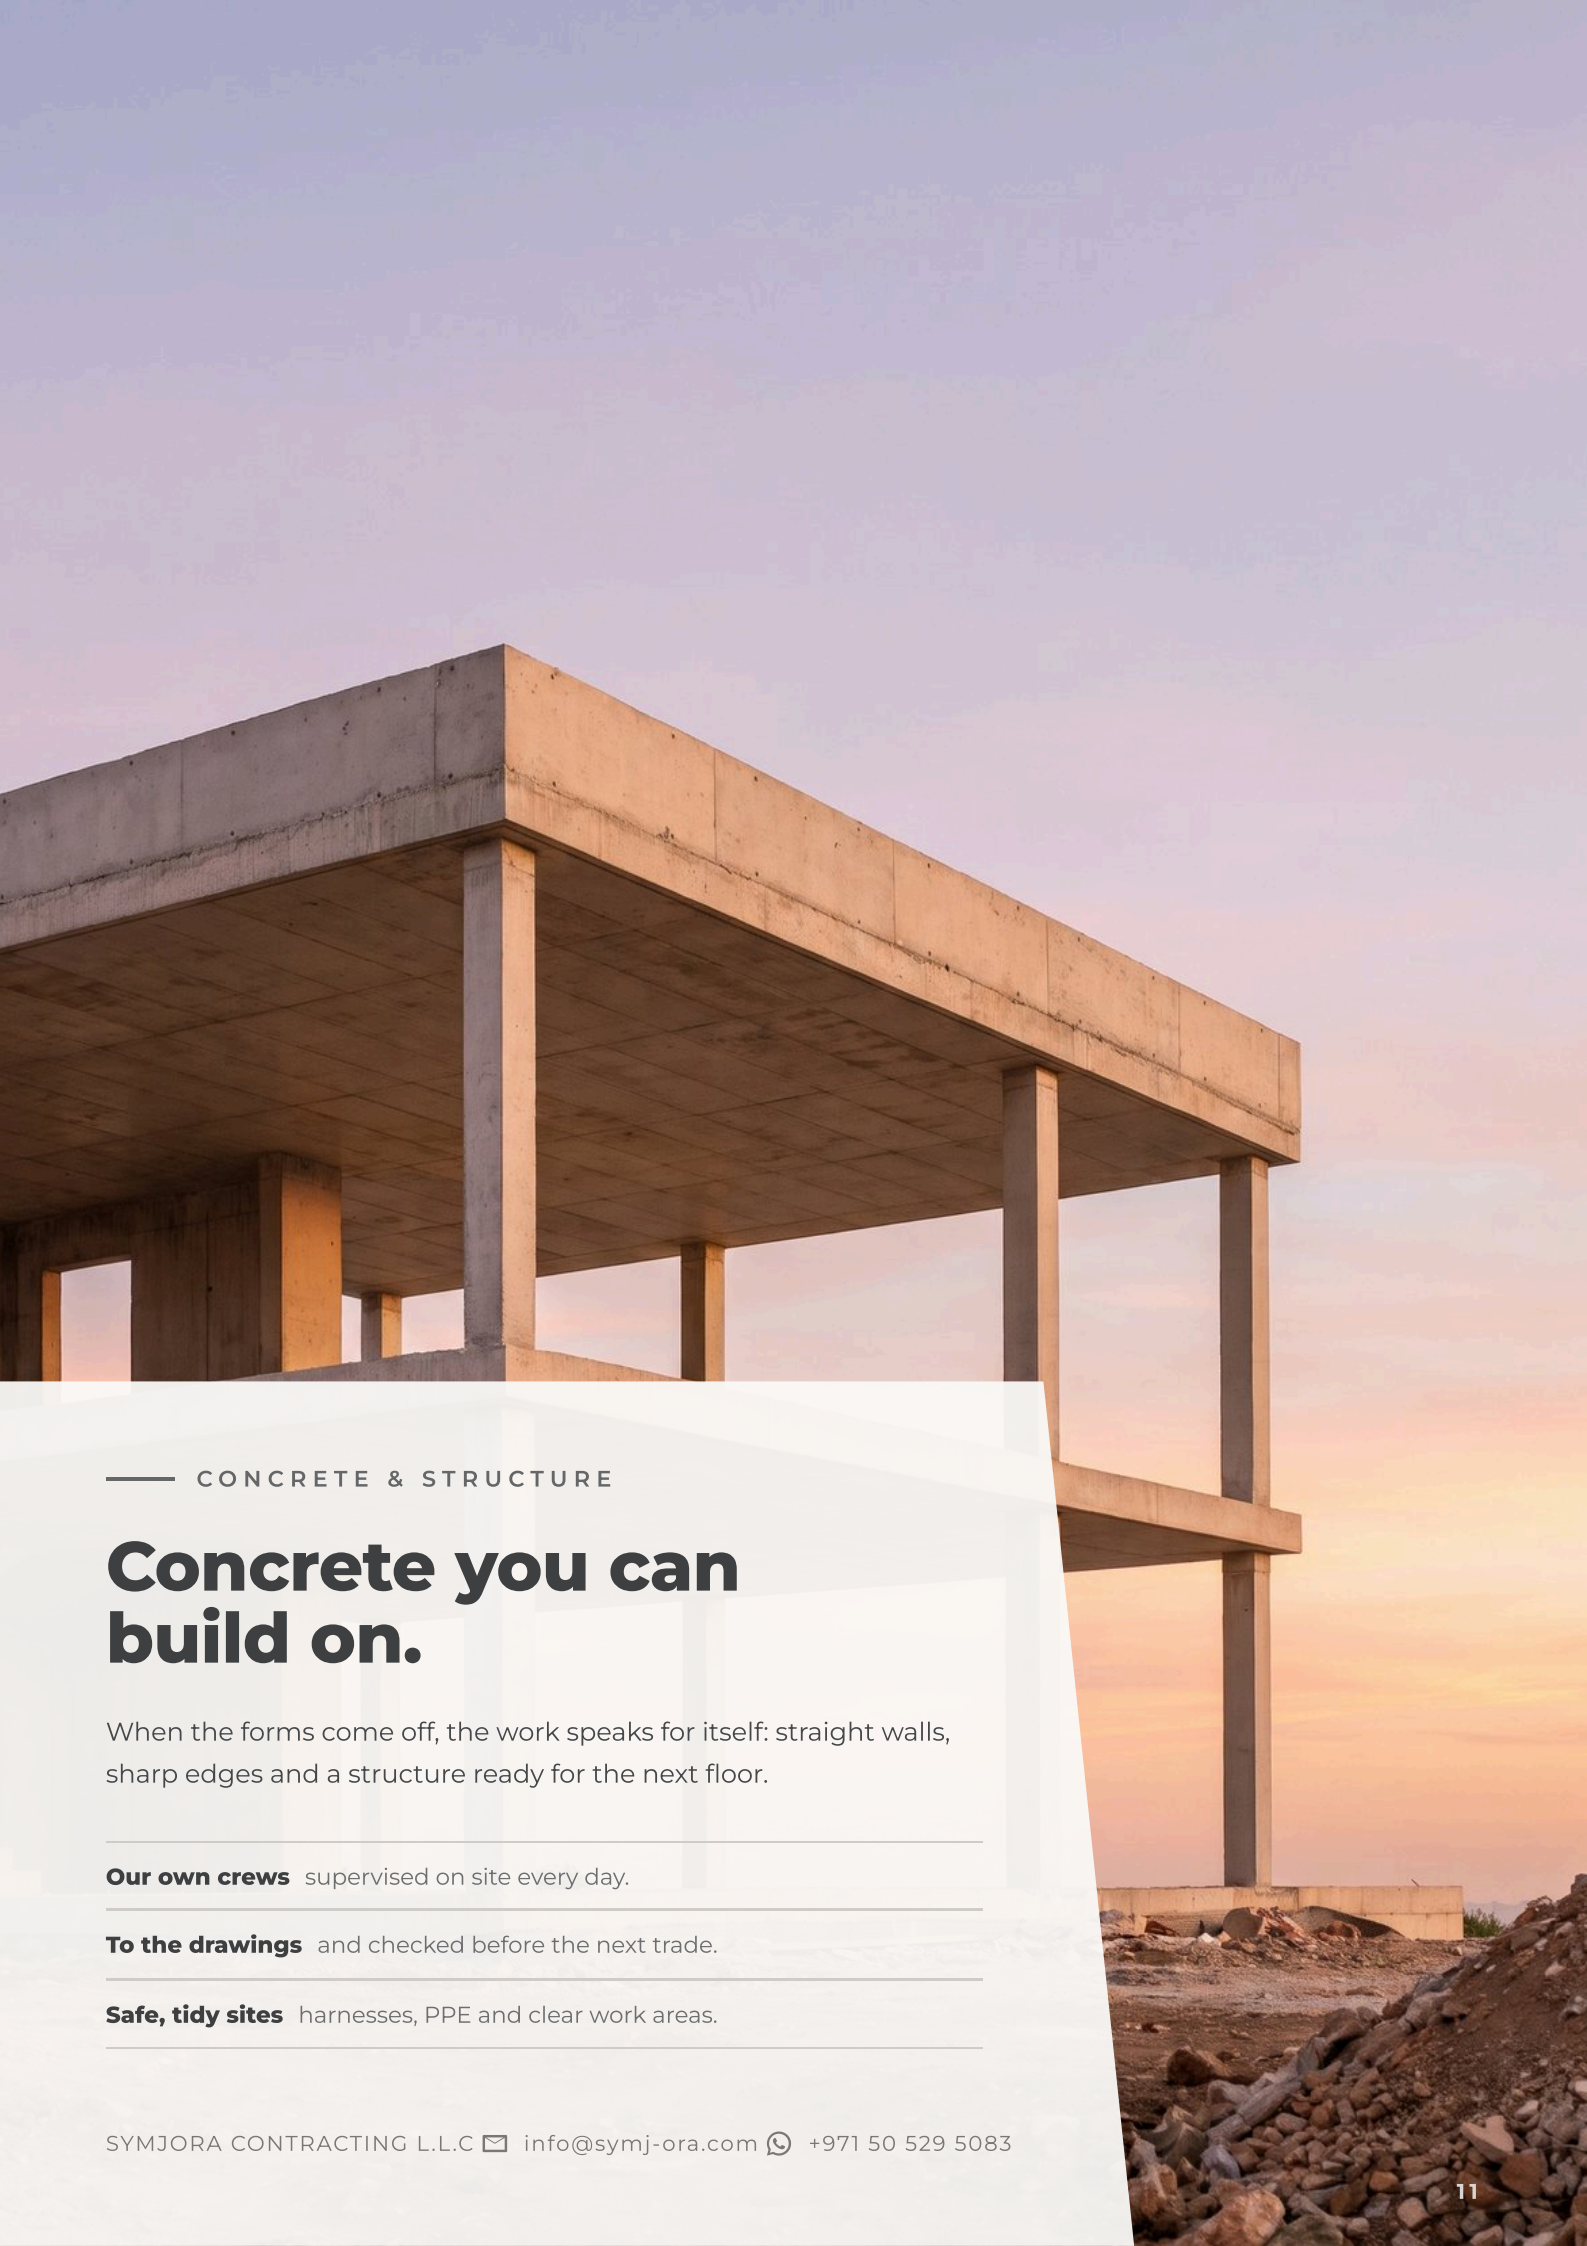

Finished basement
Walls and slab cast clean and square.

Clean concrete finish
Smooth wall faces straight from the forms.

WHAT WE CHECK ON EVERY POUR

- ✓ Inspection approved before concrete
- ✓ Delivery tickets and slump
- ✓ Test cubes taken
- ✓ Even compaction, no honeycombing
- ✓ Levels and finish as specified
- ✓ Curing started straight away

CONCRETE & STRUCTURE

Concrete you can build on.

When the forms come off, the work speaks for itself: straight walls, sharp edges and a structure ready for the next floor.

Our own crews supervised on site every day.

To the drawings and checked before the next trade.

Safe, tidy sites harnesses, PPE and clear work areas.
